

F1™
in Schools

- 📍 In-Comm Aldridge
- 📍 In-Comm Telford
- 📍 In-Comm Shrewsbury

WE ARE BRINGING F1 IN SCHOOLS TO YOUNG PEOPLE ACROSS OUR THREE TRAINING ACADEMIES.

Our mission is to support one of our teams in getting them to the World Finals putting our region on the map!

The Marches Centre of Manufacturing and Technology have secured funding via the European Social Fund and they are working closely with delivery partner The STEM Workshop to deliver some exciting opportunities one of which is the F1 in Schools challenge. We have partnered up with:

FORMAT OF THE CHALLENGE

We are keen to get as many young people across our three training academies involved in the F1 in schools challenge. The challenge not only develops the student's skill set across Engineering but will also develop their employability skills. All schools involved will be assigned a local company sponsor who will mentor the team and will receive ongoing support and advice from all partners involved.

STAGE 1 - LAUNCH EVENT

As part of our revised offer we are running launch events at all of our three academies or at your school or organisation. We will launch the challenge to the teams. The teams will work alongside their mentor from a local businesses. During the day they will take part in a series of practical workshops that will prepare them for the challenge and get them to understand what is expected of them. This will of course involve racing a car that they will manufacture on the day.

STAGE 2 - SUPPORT SESSIONS

Your school or college will be able to access support sessions at one of our three training academies, The University of Wolverhampton, Telford campus or at your schools. These will take place between the launch event and the regional final to support your teams in their involvement in the challenge. These will be completely bespoke to support the needs of the school, so this may be a session using Computer Aided Design and Computer Aided Manufacture to manufacture your car, or you may just want to access the race track.

STAGE 3 - REGIONAL FINAL – DATE TO BE CONFIRMED

All teams will take part in The Regional Final which will take place at our training academies in 2022. (schools will need to consider this when selecting their teams) whereby the winning team will secure a place at the National Final.

STAGE 4 - NATIONAL FINAL – DATE TO BE CONFIRMED

Our winning team will then go on to represent our region at the National Finals!

STAGE 5 - WORLD FINAL – DATE TO BE CONFIRMED

If we meet our goal, our winning team will go on to represent our region at international level.

Places are available for up to 21 students from each school/college who are currently studying in Year 10 to 13.

To secure your place or for more information contact:
